**ROCKY MOUNTAIN DIVISION**  
**USEF Non-Recognized**

The Rocky Mountain Horse naturally demonstrates a smooth, ambling gait which glides forward. The horse moves out with a lateral gait in which one can count four distinct hoof beats that produce a cadence of near equal rhythm. The speed may vary, but the four beat rhythm remains constant. The gait may technically be described as the simultaneous but asynchronous motion of the same side of the body followed by the movement of the legs on the opposite side. The gait is initiated by the hind leg. The length of the stride for both hind and fore legs should be nearly equal. The Rocky Mountain Horse moves his feet with minimal ground clearance and minimal knee and hock action.
